NEAL GERBER

2129 E. 3205 S.   neal.g.gerber@gmail.com
Salt Lake City, Utah 84109   (303) 517 2008

Focused and hard-working individual looking to complete the University of Utah Fullstack web development program. Experienced in web development using HTML, CSS, Javascript, React, MySql and MongoDB. Comfortable using third party API's, CSS frameworks like Bulma and Bootstrap and Javascript libraries like JQuery.

Education:
Bachelor of Science in Biology University of Oregon (2012)
International Institute of Clinical Laboratory Sciences Certificate (2014)

Web Development Highlights:
Utah Snapshot: A comprehensive outdoor recreation application that displays weather and recreation opportunities across eight of Utah's most popular destinations. This project makes use of the APIs Openweather and Mapbox as well as the CSS framework BULMA. The app also uses SVG to create a user-friendly clickable map of Utah.
URL: https://nggerber.github.io/Recreation-Weather-Planner/
Weather Dashboard: This quick and easy application allows the user to search any city and get a current and five day forecast for that location. It uses the Openweather API to display the information in a friendly format displaying the temperature, wind speed, humidity and UV index along with an appropriate weather icon.
URL: https://nggerber.github.io/weather-dashboard/
Workday Planner: An application that allows the user to input their tasks for the work day in an easy to read format. As the day progresses the planner updates in real time greying out past tasks and highlighting the current one. All while saving your task so that the page can be reloaded later.

Amalganation: This full stack application is meant to be the beginning of an Interactive social media platform. Where users can play games, chat and explore different cultures in a time of the Covid pandemic. The application utilizes sockets.io to create a real time chat where users can enter different chatrooms and discuss different topics.
